

The game has changed. Time to change the rules.

If ever there was a time to change the rules of the game, this is it.

Energy prices are skyrocketing. The war in Ukraine has put Europe's energy independence at the top of the political agenda. The Electric Decade, a revolution powered by clean and decarbonised electricity, must accelerate drastically to keep up with a changing geopolitical landscape. Which game changers, which structural solutions, can we envisage? This is the theme of the 2022 Power Summit.

Because sustainable change requires a clear strategy.

The Power Summit, our award-winning annual conference, is where leaders of the European power sector and top decision-makers will come together to exchange ideas and discuss the game-changing solutions needed for policy, technology, finance, and people. Join Heads of State, Commissioners, CEOs, and civil society to debate the game-changing strategies vital for the energy transition and discover how we can accelerate the Electric Decade together.

The game has changed. Time to change the rules. And play for our energy future.

Don't miss this opportunity to stay up to date with the latest developments, opinions, and connections. Power Summit 2022 includes:

- Multiple conference sessions and round tables with the world's leading experts
- Innovative and high-value content and exhibitions
- Unique networking opportunities with high-level power players and decision-makers

Day 1 – 15 June am (Ticket Window Hall (Ground floor))

09:00 – 09:35		OPENING SESSION	
Opening	Kristian Ruby , Eurelectric Secretary General		
Introductions	Farid Safarov , Deputy Minister, Ministry of Energy of Ukraine		
	Kadri Simson , EU Commissioner for Energy (pre-recorded)		
	Jean-Bernard Lévy , Eurelectric President - CEO, EDF		
09:35 – 11:00		PLENARY: Electric Decade - Energy prices changing the investment game	
This opening session will feature valuable insights from top-level policymakers and industry leaders into key questions on the transition, setting the stage for two days of in-depth exchanges on the most critical topics affecting the power sector and its partners. These questions include:			
<ul style="list-style-type: none"> - Is the European policy framework on track to deliver a holistic response to the continent's climate challenges? - What are the potential game changers in the financing and implementation of the "Fit for 55" package? - How is the investment climate being shaped by political debates and external factors? - Can Europe deliver on its climate leadership ambition under these conditions? 			
Introduction & moderation by	Lawrence Slade , Chief Executive Officer, GIIA		
Keynote & panel:	Catharina Sikow-Magny , Director of Green transition & energy system integration, DG ENER, European Commission		
Setting the scene	Melissa Stark , Global Renewables and Energy Transition Services Lead, Accenture		
Panel debate	Claire Waysand Executive Vice President, in charge of Corporate Secretariat, Strategy, Research & Innovation and Communication, ENGIE SA	Matthias Rebellius Member of the Managing Board, Siemens AG and CEO Siemens Smart Infrastructure	
	Peter O'Flaherty Head of Network Utilities, Equitix	Wytse Kaastra Managing Director for Utilities & Energy Transition Europe, Accenture	
	Pawel Cioch Vice-President Corporate Affairs, PGE		
11:00-11:30		BREAK	
11:30 – 12:30		POWER TALK: Hydrogen: A good game changer for industry?	
This discussion aims to:			
<ul style="list-style-type: none"> - Identify applications where it will really make sense to use hydrogen. - Discuss the incentives required to cut the cost of producing electrolytic hydrogen to compete with fossil-based hydrogen. - Map out the public and private investments realised or announced. - Exchange on the European market design for hydrogen. 			
Introduction & moderation by	Jesse Scott , Director International Programmes, Agora Energiewende		
Keynote & panel	David Bryson , Chief Operating Officer and Chief Sustainability Officer, Uniper		
Panel debate including above speaker	Henning Herenstein Deputy Head of Unit, Energy Intensive Industry, DG GROW	Gaia Stigliani Principal, AFRY Management Consulting	
	Vilislava Ivanova Senior Researcher, E3G	Charles Hertoghe Vice-President Strategy and Business Development at ENGIE Thermal Europe	
12:30-14:00		BREAK	
13:15-13:45		*Redefining Energy Special (Ticket Window Hall (Ground floor))	

Come and listen to **Laurent Segalen**, Founder, Megawatt-X and **Gerard Reid**, Energy Transition Investment Banker put **Jorgo Chatzimarkakis**, CEO, Hydrogen Europe in the spotlight with regard to the role of Hydrogen in ensuring a clean and decarbonised future.

Day 1 – 15 June pm

14:00 – 15:00 **POWER TALK Market Design 2.0: Which game plan for customer engagement?**

Affordability is key to ensure customer engagement in the energy transition and to make decarbonization a reality. In recent months, Europe has been experiencing rising wholesale electricity prices – predominantly caused by the increase of global natural gas prices. This, in turn, has led to consumer concerns and triggered political debate across the continent.

The electricity price surge has led to questions around the efficiency of the electricity market and whether some adjustments, improvements at wholesale and retail level are needed to make it fit for the energy transition.

This session will take stock of the state of play around electricity prices and market design at EU level and discuss how the power sector can actively contribute to this debate.

Introduction & moderation **Wytse Kaastra**
Managing Director for Utilities & Energy Transition Europe, Accenture

Keynote & panel **Simone Mori**
Head of Europe, Enel Group

Panel debate **Christophe Gence-Creux** **Monique Goyens**
Head of Department – Electricity & Chair of Market European Stakeholders Committee, ACER Director General, BEUC

Paula Pinho
Director of Just Transition, Consumers, Energy Efficiency and Innovation, DG ENER, European Commission

15:00–15:30 **BREAK**

15:30–16:30 **POWER TALK: Digital Disruption: How data creates a whole new ball game**

Digitalisation enables European power networks to become more connected, intelligent, efficient, reliable, and sustainable, while inevitably changing how we supply, purchase, and interact with electricity. Data collection and exchanges are growing exponentially, creating digital threats but also valuable opportunities for the power sector. Amid such a rapidly evolving context, this Power Talk will foster a discussion about the implications of Europe's digital energy revolution, the new business models needed to make the best of it, and the policy frameworks required to facilitate these developments.

Welcome and moderation **Lucy Craig**, Senior Vice President, Growth, Innovation and Digital Energy Systems, DNV

Keynote & panel **Gary Lawrence**, Segment President Power & Grid, Schneider Electric

Panel debate **José M^a Torres** **Michel Fraisse**
Head of Smart Grid Unit, Ormazabal Europe Vice President & CTO, Huawei Digital Power

Vincent Berrutto **Naomi Chevillard**
Head of Unit Innovation, Research, Competitiveness, and Digitalisation, DG ENER Head of Regulatory Affairs, SolarPower Europe

16:30–16:45 **BREAK**

16:45-18:00 WORKSHOP 24/7: Energy matching: High impact corporate sourcing of carbon free energy

Moving towards a verifiable system of matching the production of carbon-free sources of energy with consumption 24 hours a day, 7 days a week (24/7) can help accelerate the decarbonisation of the grid. As interest from consumers in hourly carbon-free energy matching is growing – with a range of corporate, public sector and institutional energy buyers targeting 24/7 matching for their operations – the ecosystem of 24/7 practitioners across the whole electricity value chain is also expanding rapidly.

This workshop intends to explore:

- How a variety of different players are implementing hourly clean energy matching?
- What are the lessons learned from existing 24/7 matching case studies?
- What are the opportunities for suppliers and solution providers to grow this movement?

Introduction & co-moderation	Bruce Douglas , Director Business & Communications, Eurelectric Joop Hazenberg , Policy & Impact Director, RE-Source platform
Keynote	Caroline Golin , Global Head of Energy Market Development and Policy, Google
Delivering 24/7 clean energy	Sébastien de Menten , Innovation Project Lead, Engie
Modeling 24/7 impact on the grid	Tom Brown , Professor of "Digital Transformation in Energy Systems", TU Berlin
Getting to 24/7 in practice	Constant Alarcon , Programme Manager for Clean Energy at C40 Cities
Digital 24/7 clean energy	Fiona Tiller , Product Owner -TraceX, Powerledger
Interactive survey + discussion with audience	moderated by Bruce Douglas , Director Business & Communications and Diana Gherasim , Advisor RES & Storage, Eurelectric <ul style="list-style-type: none"> ➤ Surveying participants' willingness to pursue 24/7 solutions themselves. ➤ Hearing from participants directly - what changes / evidence / resources would they need in order to actively pursue 24/7. ➤ What opportunities do participants see for suppliers / solution providers?
Closing remarks	Caroline Golin , Global Head of Energy Market Development and Policy, Google

(Ticket Window Hall (Ground floor))

Day 2 – 16 June am (Ticket Window Hall (Ground floor))

09:00 – 09:30		OPENING SESSION	
Welcome Day 2	Kristian Ruby , Eurelectric Secretary General		
Keynote	Patrick Graichen , State Secretary at the Federal Ministry for Economic Affairs and Climate Action, Germany		
09:30 – 11:00		PLENARY Power Plant – Time to change the game on permitting	
<p>We set out a vision in which protecting biodiversity and achieving ambitious climate and energy objectives go hand in hand. To tackle a multifaceted problem, we go beyond siloed thinking and reveal the best practices across Europe that bridge biodiversity, agriculture, funding, energy, data and economy.</p> <ul style="list-style-type: none"> – Get inspired by best practices from existing integrated RES projects. – Build knowledge around exploitable synergies for successful integration of energy, climate, and biodiversity objectives. – Step into a future reality where decarbonisation and nature regeneration go hand in hand 			
Introduction & moderation	Kristian Ruby , Secretary General, Eurelectric		
Panel debate	Miguel Stilwell de Andrade , CEO, EDP	Jutta Paulus , MEP	
	Noor Yafai , Europe Director Global Policy and Institutional Partnerships, The Nature Conservancy		
	Jochen Hauff , Director Corporate Strategy, Energy Policy & Sustainability, BayWa r.e. AG		
Policy vision	Virginijus Sinkevičius , EU Commissioner for Environment (pre-recorded)		
Industry vision	Francesco Starace , Chief Executive Officer and General Manager of Enel S.p.A. (pre-recorded)		
Concluding remarks	Marianne Kleiberg , Managing Director Europe, The Nature Conservancy		
11:30 – 12:30		POWER TALK DSOs – Their role in the grid investment toolbox	
<p>Eurelectric's landmark "Connecting the Dots" study identified that €375-€425 billion of investments are needed to make the distribution grids fit for purpose in an increasingly decarbonised, decentralised, and digitalised power system. While the study focused on investments needs and drivers, it remains open to which forms of investment can take place. DSOs, for instance, have a range of options to solve congestions – network tariff design, grid reconfiguration, tradition reinforcement, and flexibility procurement, among others. The feasibility and cost-effectiveness of each option shall be carefully considered and compared in the final investment's decision.</p>			
Introduction & moderation	Carolina Vereda , Chair, Eurelectric WG Regulation & Network Customers Regulatory Affairs, Endesa		
Keynote & panel	Sabine Erlinghagen , CEO Grid Software, Siemens Smart Infrastructure		
Response	Sabine Crome , Policy Officer, Internal Energy Market Unit, DG ENER, European Commission		
Panel debate	Annegret Groebel CEER President & Director of International Relations, Bundesnetzagentur	Annika Viklund Senior Vice President and Head of Business Area Distribution, Vattenfall Distribution	
	Stephen Woodhouse Director, AFRY Management Consulting		
12:30-14:00		BREAK	

Day 2 – 16 June pm (Ticket Window Hall (Ground floor))**14:00 – 15:00****POWER TALK Climate adaptation: the game plan for resilience**

The combination of changing climate conditions – including more frequent and intense extreme weather – and the growing importance of electricity in the clean energy transition, means that power sector resiliency is essential. The industry needs to boost resourcing to make power supplies more resilient to disruptions from weather, cyber attacks, and multi-factor events. Utilities, regulators, and policymakers will provide their insights on the future power system, the environment in which it will operate to identify critical resiliency and adaptation investments, and the creation of an associated regulatory framework.

Introduction & moderation**Goran Hult**, VP Nuclear & Development, Fortum Sweden**Keynote****Arshad Mansoor**, President and CEO, EPRI**Panel debate****Stephan Lechner**Director, Euratom safeguards
DG ENER, European Commission**Christine Materazzi-Wagner**Chair, ACER & CEER Electricity Working Groups
Director Electricity, E-Control**Alejandro Hernandez**

Head of Unit Renewable Integration and Secure Electricity, IEA

Christina Papapostolou

European Affairs Director, PPC

15:00–16:00**Executive Dialogue & Concluding remarks**

The closing session will feature a discussion by industry leaders on the future of the sector, the challenges ahead, and the game-changing technologies at our disposal. Moderated by journalist Laura Shields, this concluding event will outline how the entire sector needs to raise its game in the race to clean energy and a net-zero future.

Introduction & moderation**Laura Shields**, Founder and Managing Director, Red Thread**Executive dialogue and CEO Panel****Kristian Ruby**
